

1 Threshold
Gateway feature welcomes people into the park. Artwork and an information board tells the Hulme Street Linear Park story.

2 Access
Proctors entrance relocated to Jacksons Crescent. Pedestrian refuge added to improve pedestrian safety when crossing over to reach Hulme Park.

3 Orchard
Located at the entrance to take advantage of the sun whilst also acting as a living gateway feature to the Park.

4 Cycle Lane
Provides a quick route that links to the pedestrian crossing over the Mancunian Way, whilst making it easier to get to Hulme Park and beyond.

5 Parking
The end of Hummanby and Humberstone road opened up to enable parking at the ends. Turning circle to be enforced as a no parking area to permit turning and deliveries.

6 Kitchen Garden and Events Space
Located in the centre of the park. A south facing timber deck takes advantage of the sunshine, providing the opportunity for outdoor events and performances. Moveable picnic tables enable outdoor dining and meetings but can be stored away when not in use. Raised planters define and shelter the space whilst bringing colour and texture.

7 Workshop Area
Space for making artwork and crafts, can be tailored to fit the needs of the community.

8 Enterprise Space
Located in a sunny part of the street, at the entrance to Hulme Street, this space will be clearly visible to passers by with a steady foot fall of pedestrians. Possible location for future community building and enterprise activities.

9 Boundaries
Defensible space has been created to give the Hulme Street flats more privacy. Shade loving plants will be planted within the space. The space is enclosed by a hedge / low metal railings subject to resident's approval.

10 Play Area / Green Gym
Located under the trees, this facility will be constructed from natural materials (timber and stone) to have a low visual impact on the overall appearance of the Park. Material from the felled tree will be used to construct obstacles which will engage people of all ages to use their imagination and agility, making up games or simply travelling from one end to the other. Larger area located away from flats has bark chip surfacing and takes advantage of increased light levels.

11 Mancunian Way
Raised planters provide the opportunity to grow plants to help create a living screen to the Mancunian Way, helping to reduce its impact on Hulme Street.

12 Nature Area
Created to improve local bio-diversity. Informal area with native species providing year round interest with minimal maintenance. The larger shrubs in the corner will help to reduce the impact of the Mancunian Way. A mixed hedgerow acts as a "Green Finger" leading to Espalier planting linking to Hulme Park which will provide a habitat and food source for birds and insects.

13 Artwork Beacon
Prime location for a statement artwork where it will be visible from Mancunian Way. This artwork will celebrate the Park, acting as a beacon to spread the story of Hulme Street Linear Park. Residents and local artists to be involved.

14 Compost Bins
Water butts will also be provided.

Key

Existing Tree to be retained	Proposed Espalier Planting	Proposed Hedgerow Defines boundary - maintained by City South	Proposed Bulb Planting provides seasonal variety and colour	Raised Fixed Brick Planter bricks finished with masonry paint	Proposed Raised Timber Deck Sustainably sourced Hardwood Timber	Gateway Arch / Threshold Welcome Artwork feature (design to be confirmed with community)	Resin Bonded Overlay to existing road surface Buff Colour	Creative Play Variety of features for imaginative play including; Stepping stones, tree stumps, boulders
Existing Tree to be pruned works include - crown lift, thinning	Proposed Fruit Tree	Proposed Shrub Planting Seasonal variety to boost biodiversity (low maintenance)	Existing Lighting (to remain) LP = Lamp Post (approx position) FL = Flood Light (approx position)	Raised (moveable) Timber Planter (recess to facilitate moving by forklift), if required	Proposed Metal Railings provides privacy for Ground floor residents; 1m high; painted to resident's colour choice	Artwork/ Gateway Feature Location Design to be confirmed - community consultation and input	Resin Bonded Overlay to existing road surface Silver Grey Colour	Proposed Moveable Hardwood Timber Bench Bench, picnic tables (large and small)
Existing Tree to be removed (based on info from Arbor Survey)	Growing Area -Edible Plants Vegetables, fruit, herbs. Soil improvement works required for planting in ground	Fallow "Pockets" land over existing services to be seeded with wildflower to boost biodiversity	Raised planter with trellis Encourages planting to grow vertically and horizontally to provide a screen	Raised Timber Planter with sealing edge to edge of deck	Proposed Metal Gate 1m high; painted to resident's colour choice	Gateway Beacon Artwork Visible from Mancunian Way Design to be confirmed - community consultation and input	Resin Bonded Overlay to existing road surface Brown Colour	Proposed Location for Future community building. Enterprise space could feature artwork by local Youths (from Proctors) to strengthen links with community
